DESIGNBASE-SL molding profile, sealing lip, and matching accessories in matte white color-coated aluminum used to create the baseboard on the wall.

For more information on Schluter® profiles including available accessories, finishes, and colors visit www.schluter.com

TREP-E stair-nosing profile in stainless steel applied to the stairs. **DILEX-EHK** cove-shaped profile in stainless steel used to create a smooth transition between the floor and first step. **DESIGNLINE** decorative border profile in stainless steel used as a decorative accent in the floor.

DITRA uncoupling membrane installed over the concrete slab allowed the **DILEX-KSN** movement joint profile to be placed along one of the curves to create a natural-looking break between the two different tile colors.

DILEX-KSN incorporated in the tile field of this indoor parking garage.

Many Schluter® profiles are available with a special radius perforation to suit curved designs.
Look for the radius icon in your Illustrated Price List.

RONDEC bullnose profile and corner piece accessories in bronze textured color-coated aluminum used to finish the edges of the tiled drawers.

New!

Schluter®-DESIGNBASE-SL

Molding profiles

DESIGNBASE-SL is a new alternative to baseboards. Available in anodized and color-coated aluminum, it features a clean, polished look, and is simply attached to the wall with a suitable adhesive. An optional sealing lip accessory is available to protect the floor/wall transition from moisture penetration and to reduce the transmission of impact sound.
