**KSC Premium Sills** are available in greater depths through the use of our Extension Kit. The Extension Kits consist of a vinyl extension, made of the same materials as the base sill, and a T-Strip that fills the seam between the base sill and the extension.

Extension kits are available for both Standard sills and Premium sills, allowing for sill depths of 9,10, and 11 inches. These deeper sills include:

- An 8-inch deep sill
- A Vinyl sill extension (either 1, 2, or 3 inches deep)
- A t-Strip (to fill the seam between the base sill and the extension)

KSC Premium Sills are available in two attractive profile: Classic and Streamline.

## Low Maintenance

Easy to clean requires no painting or staining.

## Durable

Made of cellular vinyl, KSC Premium Sills can take the abuse of outdoor elements, so it certainly can handle the indoor elements.

## Protects against Moisture

Moisture from condensation and minor window leaks can lead to mold growth with drywall or MDF sills. KSC Premium Sill is a water-proof barrier that protects the sill area.

## Won't Rot, Peel, or Yellow

KSC Premium Sill is made of the same high quality vinyl as many windows.
