All Trap Primers Fail
Choose the Alternative

WATER FLOWS DOWN - BUGS, ODORS, & SEWER GASES STAY OUT

Plumbing installations including a trap primer can be expensive to install initially and often require maintenance due to failure. When a trap primer fails, sewer gas, bugs and unpleasant odors can enter the building through the drain. Green Drains' patented, easy to install design solves these common issues as water can freely pass down through the Green Drain, but gases, bugs and odors are blocked by the one way seal. The Green Drain is an eco-friendly solution compared to the expense and hassles associated with trap primers.

Green Drain™
Waterless Trap Seal for Floor Drains

1. Punch out drain sizer
2. Remove drain strainer
3. Insert into drain to determine size of Green Drain™.

Available in 2", 3", 3-1/2" & 4"
