Instructions

For hollow wall thickness 0.125" to 0.500" thick

- 1. Drill 7/16" dia hole into wall at desired locations
- 2. Remove screw from anchor
- 3. Tap-in anchor with hammer into drilled hole until anchor is flush with wall
- 4. Turn screw into anchor until anchor flairs open and locks onto wall (see photo below). Screw will tighten once anchor locks onto wall.
- 5. Remove screw from anchor
- 6. Position item to be hung onto wall
- 7. Fasten item to wall by re-installing screw thru item into anchor
