

XL KNEE KICKER 10-2000GT

Scientifically Engineered!

High Shock - Absorbing Technology Bumper (Patent Pending)

Extra Wide Head!

33% more gripping power - 28% wider than conventional kickers

High Contour Neck!

Bridges Stretchers

Tough!

Thick wall die-cast aluminum parts - computer analyzed and designed to strengthen stress areas

Reliable!

New large channel stops maintain precise settings

Precise!

New high precision dial adjustment

Patent Pending!

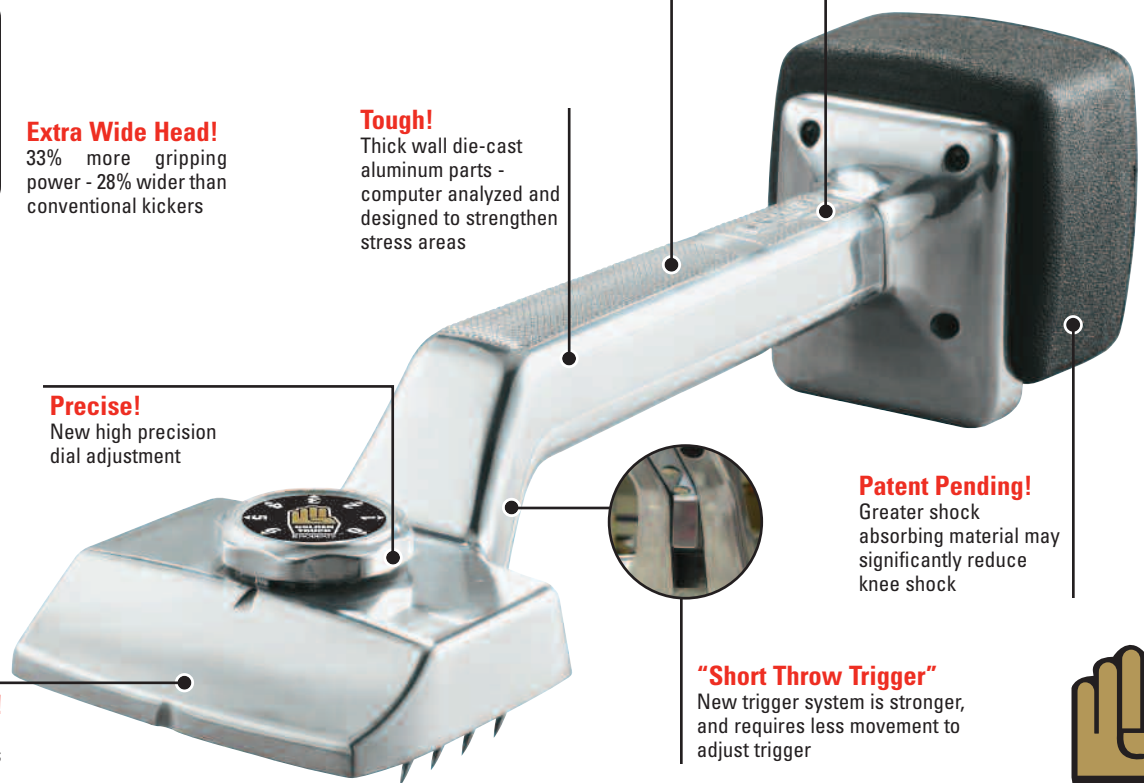

Greater shock absorbing material may significantly reduce knee shock

"Short Throw Trigger"

New trigger system is stronger, and requires less movement to adjust trigger

Extra Wide Head!

33% more gripping power. Four nap strips and five rows of pins.

Introducing the all new GT2000 XL Knee Kicker!

The Ultimate Knee Kicker! was designed with a "clean slate" – to respond to the many requests by installers for a higher performance kicker. The new technology bumper reduces knee shock with a Patent Pending "progressive density" foam rubber pad. The new wide head delivers 33% more gripping power to the carpet. And, the channel/trigger system has been strengthened. Big channel stops maintain precise settings, and the "short throw" trigger makes adjustment easier. New rubber compounds are used in the bumper boot to reduce wear and splitting. This "next generation" kicker will deliver years of performance and reliability.
