

*This document is intended for professional use to provide a starting point for Commercial Cleaning, Care & Maintenance of these products, each unique application may require additional or further steps to ensure complete satisfaction. Please refer to the general information and then the table of contents for the specific product information. Refer to the product website to confirm that you have the most current revision of this document. If you need a project specific maintenance document or if there are any questions or concerns, please reach out to [solutions@rhctechnical.com](mailto:solutions@rhctechnical.com).*

### **INITIAL CLEANING / POST INSTALLATION**

Job site conditions will cause dirt and debris to be present on the installed wall base and/or accessories. Initial cleaning should only be performed after the prescribed timeframe for the product and adhesives utilized. However, the wall base and/or accessories should be protected after installation prior to the completion of the Initial cleaning.

1. Remove any protective coverings before maintenance.
2. Create a cleaning solution with the chosen product listed in the Initial / routine cleaning section of the table below and clean potable water according to the dilution ratios from the manufacturers label information based on soiling conditions.
3. Use a wet, clean, soft & preferably white towel or cloth to apply the cleaning solution to the area.
4. Use a clean, soft towel or cloth to rinse with clean, cool water and allow wall base and/or accessories to dry completely.

### **ROUTINE CLEANING**

1. Create a cleaning solution with the chosen product listed in the Initial / routine cleaning section of the table below and clean potable water according to the dilution ratios from the manufacturers label information based on soiling conditions.
2. Use a wet, clean, soft & preferably white towel or cloth to apply the cleaning solution to the area.
3. Use a clean, soft towel or cloth to rinse with clean, cool water and allow wall base and/or accessories to dry completely.

### **PREVENTIVE MAINTENANCE / FLOORING PROTECTION RECOMMENDATIONS**

Do not slide or drag anything along the wall base and/or over the accessories. When moving appliances or furniture, protect the wall base from scuffing and tearing using temporary floor protection.

If these recommendations are not followed, we can guarantee your cleaning and maintenance will be more difficult.

Avoid the use of detergents, abrasive, alkaline, or acidic cleaners or cleaning agents which contain oil or solvents. Also mop and shine products will dull the finish and sheen and potentially break down the material.

The use of the incorrect maintenance/disinfection chemistry or the incorrect use of the correct chemistry for the maintenance/disinfection of Resilient Flooring can and will cause damage to the product that is not covered by the product warranty. If you have a question about the fitness of use of other products, please contact customer service or technical services. As with any maintenance program, be sure to use proper PPE (Personal Protective Equipment) according to the cleaning product SDS and ensure all maintenance procedures are conducted per the cleaning products instructions. The use of Caution Tape and/or Wet Floor Signs is recommended to prevent slips and falls.
