

New model is easier to install with shrink wrap method. Installation takes minutes and saves hours in maintenance.

1. **Turn chair** upside down.

Tip—Prop chair on table for easier installation

2. **Place the CasterTire™**

over the exposed part of wheel. **The flange or sharp edge on the tire faces the outside of the caster, the rounded edge goes to the inside.**

3. **Rotate the wheel**

1/2 rotation and stretch the CasterTire on until it is securely in place and centered on wheel.

4. **Use a heat gun** to shrink the CasterTire™ onto the wheel. Be careful! Do not overheat the tire or caster. Rotate the wheel 1/2 rotation as soon as the tire forms repeat the process.

5. **Use a hair dryer** on the highest setting if a heat gun is not available.

6. Installed
