

VP4 Two-Position Economical Partition Assembly Instructions

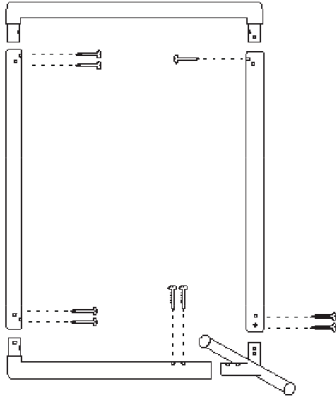

Hardware included:

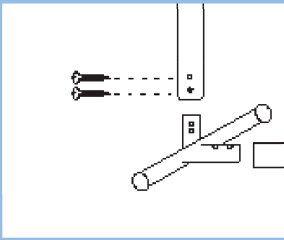

Screws

1.

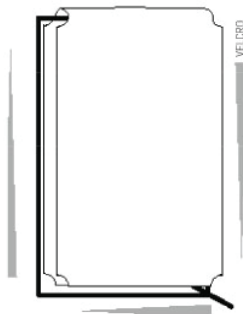

Connect tubular frame parts as shown using screws provided. Only one leg is required if directional flexibility is desired. With one leg you can easily flip your Panel from vertical to horizontal.

Second leg option:

VP4 comes with an optional second leg. If two legs are desired for a secure, static position, install second leg in desired location in place of a corner piece while connecting the other parts of the frame in step 1.

2.

Add on canvas exterior using velcro attachments around poles.

Assembly complete!
We hope you enjoy your new VP4!
