

# WX12 Series, 3/4" Wing Paintable Textured Vinyl Corner Guard

- Standard Heights are 4' and 8'.
- Custom Heights are available, all custom cuts have a plus or minus 1/8" tolerance.
- Paintable surface with an orange peel texture.

## **Installation**

Paintable Vinyl Corner Guards are installed using the factory installed 1/32" foam tape with permanent rubber-based adhesive.

## **Painting**

Use a water based paint, preferably with a high gloss finish. The high gloss finish will prevent scuffs and scratches from showing too much. Keep the surface of the corner guard clean during installation and do not apply paint while the corner guard is wet.
