

Concrete Wrap™

A blanket of
protection
for concrete
columns

Always on guard

A blanket of protection that cushions the blow

- Molded from a semi-flexible, crack resistant plastic and filled with an optimal 2" thick foam padding, Concrete Wrap is extremely flexible
- Thick foam padding absorbs the force of tow motor impact protecting people, equipment, and concrete from damage
- Ribbed inner surface form fits to a variety of round columns, grips securely, minimizing slippage when hit from any angle.
- Secures to column with hook and loop straps

Maintenance free

- Waterproof, easy to clean
- Chemical-resistant and non-conductive
- UV stabilized safety yellow plastic – highly visible, permanently prevents fading
- Protects under virtually any condition and in temperatures down to 0° F
- Easily removable

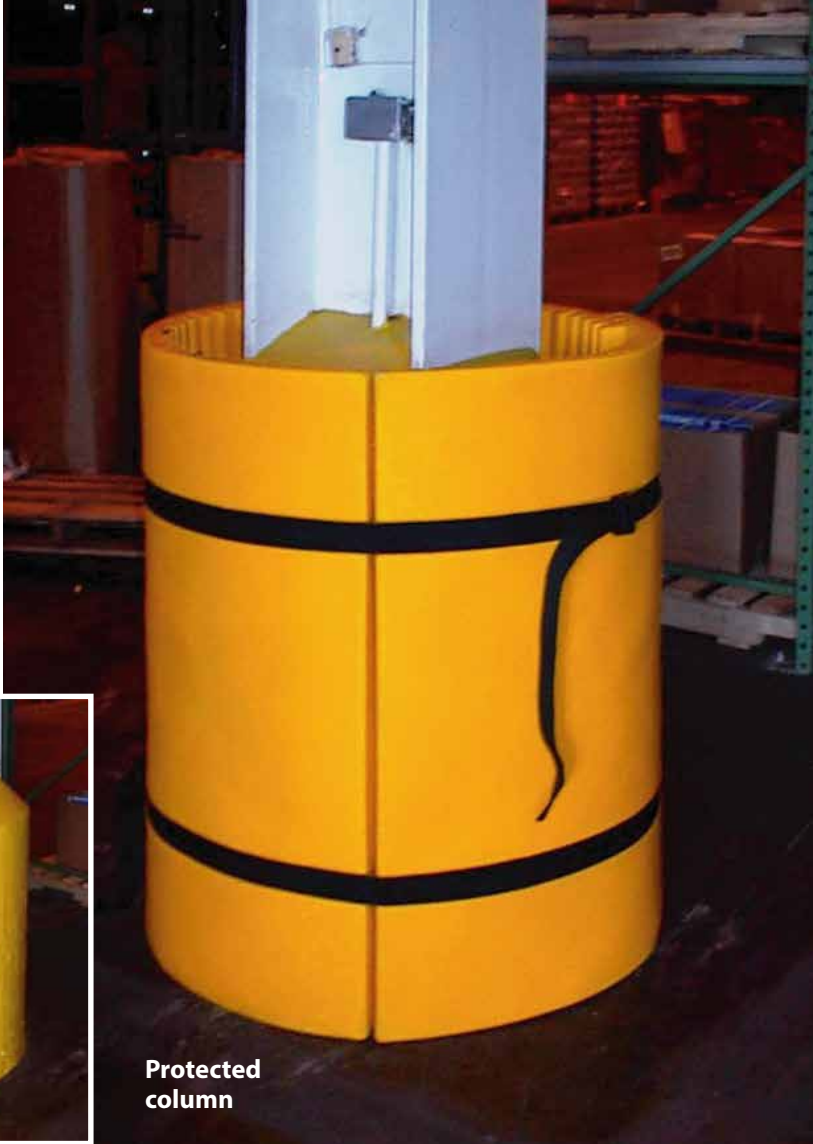

Flexible with a perfect custom fit

- Available in 42" and 48" heights; both sizes are 44" wide.
- Multiple kits can be used for large concrete applications
- Quick, easy installation
 - Wrap blankets around concrete- trim off excess to create a custom fit. Tighten straps and lock in place
- Perfect for retrofit over existing concrete bases

- Save time, labor, and the cost of other materials
- For concrete wall protection, Concrete Wrap sheets can be bolted to wall surface
- Eliminates constant chipping, painting, and maintenance of concrete bases

Concrete columns take a beating. Hits from trucks and tow motors scrape, chip and crack the concrete, eventually leading to costly repairs, material replacement, downtime, and man hours. Concrete Wrap surrounds concrete columns with a protective layer of impact absorbing material that minimizes the force of hits from truck and tow motor impact.

Damaged unprotected column

Protected column

Our complete line of protection products will help guard against expensive product damage, equipment damage and lost productivity.
