Wabo® HingeMount

Interior Expansion Control System

Features	Benefits
• Surface Mount	Reduces construction costs, no preformed blockouts required.
• Low Height	Accommodates a variety of floor surfaces.
• Designed per ADA guidelines	Pedestrian friendly

DESCRIPTION:

Wabo® HingeMount is a durable expansion joint system recommended for new or retrofit projects where thermal movement and vertical displacement from building settlement is expected. The system easily installs and surface mounts directly to concrete slabs. HingeMount is available for pedestrian applications and utilizes an integral hinge feature that easily accommodates vertical offsets up to 1 inch.

RECOMMENDED FOR:

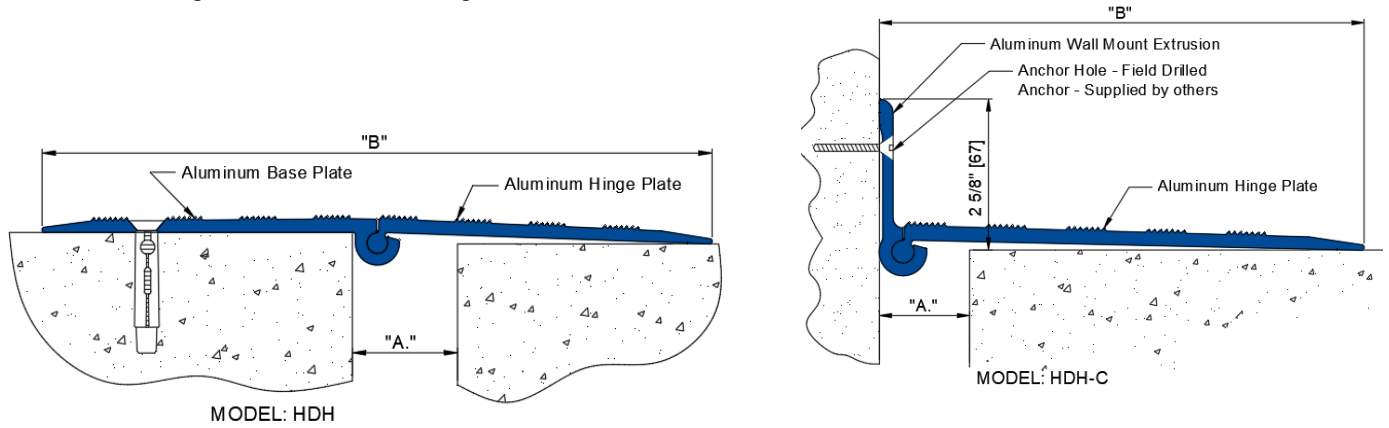

- Interior expansion joint applications.
- For use in various construction projects including:
 - Health-Care
 - Recreation
 - Retail
 - Commercial
 - Educational

PACKAGING/COVERAGE:

- Expansion joint aluminum components are shipped in standard 10 foot lengths.
- All materials and components are palletized and/or packaged in manufacturer's standard labeled carton.
- Aluminum profiles supplied in standard mill finish.

TECHNICAL DATA:

See Wabo@HingeMount Sales Drawings for additional details.

Movement Table

MODEL NUMBER	JOINT OPENING ("A")		SYSTEM WIDTH ("B")		TOTAL MOVEMENT	
	inches	mm	inches	mm	inches	mm
HDH-200	2.0	51	8.00	203	2.00	51
HDH-300	3.0	76	13.13	333	5.00	127
HDH-600	6.0	152	16.63	422	8.00	203
HDH-200C	2.0	51	4.000	102	1.50	38
HDH-300C	3.0	76	7.250	184	2.50	63
HDH-600C	6.0	152	9.688	246	3.00	76

PHYSICAL PROPERTIES:

Aluminum Extrusions and Shapes: Materials shall conform to properties of ASTM B221, 6063-T6 or ASTM B221, 6005-T5 aluminum alloy.

Moisture Barrier (optional): Provide fabric reinforced clear vinyl sheet material 0.026" (min.) thickness or compressible filler below HingeMount system.

APPLICATION:

INSTALLATION SUMMARY:

- Protect all expansion joint components from damage during installation and protect finished installation from damage from other trades during all work activities.
- Expansion joint systems shall be installed in accordance with manufacturer's typical details and installation procedures.
- Floor construction and materials shall be designed to allow for proper installation of system and its components. Construct all blockouts (if applicable) in accordance with manufacturer's recommendations.
- Construct joint openings consistent in width and straight along joint length. Inspect and verify all substrates to be solid and sound prior to work. Remove any loose materials and repair any voids, and/or spalls with appropriate repair material.
- Construct all adjacent floors to be horizontally flat along length and flush across both sides of the opening. Inspect and verify all substrates to be solid and sound prior to work.
- Install appropriate fire barrier system, if required by building code and rated construction. Contact Emseal for recommendations on appropriate fire barrier system.
- Metal components shall be cut to length on job site where required. Components shall be miter cut in the field to conform to directional changes unless otherwise contracted with expansion joint manufacturer.
- All anchor holes shall be field drilled in accordance with manufacture's drawings.

FOR BEST RESULTS:

- Do not install if the joint's anticipated movement will exceed the system's movement range.
- Deliver product in each manufacturer's original, intact, labeled containers. Protect the work area with appropriate plastic sheeting.
- Do not allow any of the components to freeze prior to installation. Store all components out of direct sunlight in a clean, dry location between 50°F (10°C) and 90°F (32°C). Store off the ground and protect from weather and construction activities.
- Do not use as a standalone system for external locations requiring watertight expansion joint system. Contact Emseal for recommendations on a secondary system.
- Periodically inspect the installed material and repair localized areas as needed. Inspect for loose components and/or hardware, repair as necessary. Consult a Sika Emseal representative for additional information.
- Make certain the most current version of the product data sheet is being used. Please consult the website (www.emseal.com) or contact a customer service representative.
- Proper application is the responsibility of the user. Field visits by Sika Emseal personnel are for the purpose of making technical recommendations only and not for supervising or providing quality control on the jobsite.
