() - Denotes Millimeters

To achieve full movement capability, "Aluminum Base Members" for each "Model" above should be installed at the corresponding listed "J.O. @ Mid." dimension. If actual joint opening is smaller than listed dimension, consult Sika Emseal prior to installation.

Blockouts should extend a minimum of 1 1/2" beyond visible edge of "Aluminum Base Member" to allow for installation of "Non-Shrink Grout (By Others)".
